

## Applied Identity Joins Google Enterprise Partner Program

Secure Cross Domain Search solution controls access to sensitive information for Google Search Appliance customers

**SAN FRANCISCO, CALIFORNIA - January 5, 2009** – Applied Identity, Inc., a leader in identity aware network security solutions, today announced it has joined the Google Enterprise Partner program, which extends the power of Google search across the enterprise and helps customers get more value out of their Google enterprise deployments. The company also announced the availability of its Secure Cross Domain Search solution for Google Search Appliance customers.

Secure Cross Domain Search for the Google Search Appliance is based on Applied Identity's Identisphere™ identity aware networking solution and is implemented with Applied Identity's ID-Enforce hardware appliances. As an appliance-based access control solution working at the network level, it deploys quickly with Google Search Appliance and requires no changes to existing applications.

"Organizations in all industries are using the Google Search Appliance to improve operational efficiencies and share information," said Dennis Pollutro, Vice President of Federal Sales for Applied Identity. "Many government agencies need to be able to share information internally as well as with other agencies without the risk of compromising sensitive information. With Secure Cross Domain Search for the Google Search Appliance, we are helping to ensure that organizations and federal agencies have more granular network control for accessing and sharing sensitive information."

"Google is excited to have Applied Identity as a partner in the Google Enterprise Partner program. We're looking forward to Applied Identity enhancing the power of Google search by providing the Secure Cross Domain Search solution to Google Search Appliance customers," said Brent VerWeyst, Search Partner Lead, Google Enterprise.

### About the Google Enterprise Partner Program

The Google Enterprise Partner program includes developers, consultants and independent software vendors that provide value-added services for Google enterprise products. For more information on the Google Enterprise Partner program, please visit [www.google.com/enterprise/gep](http://www.google.com/enterprise/gep).

### About Applied Identity

Founded in 2004, Applied Identity is a leading provider of enterprise-class, identity aware network solutions that help organizations to simplify, consolidate, define and enforce network security policies to help demonstrate compliance and to reduce business risk.

Applied Identity allows organizations to:

- Save time with user and network resource activity reports based on user identity
- Significantly reduce costs, deploying quickly by consolidating disparate identity data stores, policies and reporting
- Administer efficiently with centralized policies based on User, Role, or Group

- Manage ongoing Return on Investment (ROI) and reduce Total Cost of Ownership (TCO) associated with securing critical network resources within identity aware network environments

Applied Identity's Identisphere™ solutions are low-touch appliances that can be rapidly deployed and seamlessly integrated into the existing network and identity management infrastructure. The ID-Enforce Gateways Models 5000, 7000 and 10000 Version 3.3 including the ID-Enforce Client ID-Mark v3.3 and the Identisphere Manager (ID-Policy v3.3) achieved Common Criteria certification at Evaluation Assurance Level 2 (EAL 2) on October 6, 2008.
